02 Bronze

03 Black

04 Champagne

Installation method

01

Step 1: Take out the rod and

Step 2: Insert the connector into

02

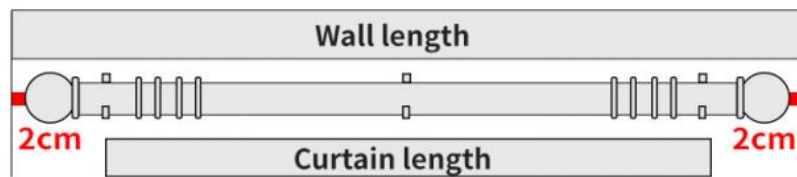

Size recommendations

Warm tips: any size can be customized, if necessary, please contact customer service.

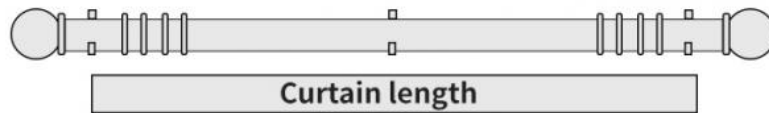

01

Reduce 2cm gap at both ends of the whole wall
For example: the whole wall is 380cm, and the total length of rod + ending is 376cm

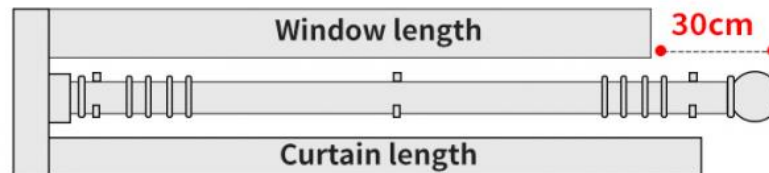

02

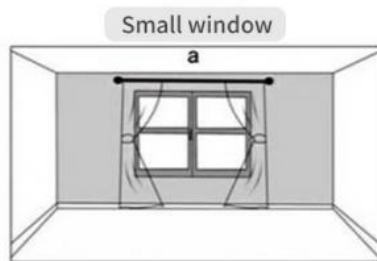

On the basis of the width of the window, there is about 30cm more on each side.
For example: the width of the window is 180cm, and the total length of the rod + ending is about 240cm.

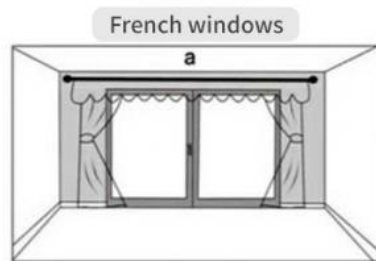

03

It is suggested that one side next to the wall should be provided with sealing and the other side should be equipped with decorative ending, the length of the side with decorative ending is increased by about 30cm.

Length of Roman rod a = total width of window + 60cm

Length of Roman rod b = total width of wall - 4cm

Tips: the calculation formula of rod length has included the size of decorative ending! (customized products will not be returned or replaced if they are not the quality problems)
